

INTER⇌ACT

**International Network for Terrestrial
Research Stations in the Cold North**

www.eu-interact.org

About INTERACT

INTERACT is a network of more than 80 research stations located in the Arctic and northern alpine and forested areas. The network builds capacity for identifying, understanding, predicting and responding to environmental change. It brings together managers of research stations, facilitates coordinated research and monitoring, and put scientists in the field through a Transnational Access funding programme.

INTERACT is funded by EU Horizon 2020: 2016-2020.

INTERACT was funded by EU 7th Framework Programme during 2011-2015.

See more on www.eu-interact.org.

INTERACT Station Managers' Forum

The INTERACT Station Managers' Forum facilitates knowledge exchange between research station managers and between managers and other partners and stakeholders.

The Forum collects and disseminates information from participating research infrastructures related to ecosystem monitoring and all aspects of station management.

The forum has produced the following publications:

INTERACT Station Catalogue

INTERACT Management Planning

INTERACT Research and Monitoring

Find these on www.eu-interact.org.

INTERACT Transnational Access

INTERACT offers access to research stations and their data through its Transnational Access, Remote Access and Virtual Access activities.

Transnational Access means free of charge, transnational access to research infrastructures or installations for selected user groups.

Remote Access means free of charge sampling or data collection by station staff at research stations.

Virtual Access means free access to metadata and data collected by the research stations.

Learn more about the results of the INTERACT Transnational Access from the popular science book, **INTERACT Stories of Arctic Science**.

Annual calls and TA publications are posted on www.eu-interact.org.

INTERACT Joint Research Activities

INTERACT cooperates with a number of scientific organisations and networks to facilitate science coordination.

INTERACT also includes Joint Research Activities on:

- *Rapid response to environmental emergency alerts*
- *Improving and harmonizing biodiversity monitoring*
- *Developing drone technology for scaling up from research stations*
- *Adapting to environmental change*

Read more on www.eu-interact.org.

Rules – Highest vs Lowest (1/2)

This INTERACT Card Game can be played by all. It is a competitive card game for two or more players where the winner ends up with all the cards.

Start:

Choose a person to start. If you cannot agree, the youngest will start. All cards are dealt to the players. The cards are piled in front of each player with the back side up. For short games, start with a random subset of the cards.

How to play:

All players draw the top card of their pile. The starting player selects a parameter that determine who wins the round. The winner of the round collects all cards and put them under the winner's card pile. The winner then choose the parameter and the game continues until one player has all the cards. If values are identical, the players with identical values draws a new card and compete in the same parameter until there is a winner of the round.

Rules – Highest vs Lowest

(2/2)

Which is best (3 versions of the game)

Simple:

Highest number wins, except Annual Temperature where lowest wins.

Medium:

Agree beforehand, which is the best (highest or lowest) for individual parameters.

Advanced:

The starter/winner of the round can determine which is the best (highest or lowest) when the parameter is called out.

Rules – Know your stations (1/2)

This INTERACT Card Game requires some knowledge of numbers and the natural environment. It can be played by three or more players, where the winner ends up with the highest pile.

Start:

Choose a person to start. If you cannot agree, the youngest will start. Place all cards in one main pile with the back side up.

How to play:

The starting player takes the top card of the pile. The starting player calls out the name of the station and selects a parameter. The other players (clockwise from the starting player) must try to guess the value of the selected parameter. Guesses cannot be duplicated by other players. When all other players have made their guess, the starting player calls out the true value and the player closest to this value wins the card and put it in a personal pile in front of the player.

Rules – Know your stations (2/2)

If two persons are equally close to the true value, the player who selected the parameter, selects another parameter from the same station card. The two remaining players compete until there is one winner. The player left of the starting player then takes the top card of the main pile and selects a parameter and the game continues until there are no more cards in the main pile. The winner is the player with most cards in their personal pile.

Advanced version:

For each station card players must try to guess all parameters. The player with most correct parameters wins the card. If more players have the same number of wins, the one with the first won parameter wins the game.

Explanation card

Opening year	<i>Year</i>
Northern latitude	$^{\circ}\text{N}$ – Degrees, minutes (a measure of distance from the North Pole)
Altitude of station	<i>m a.s.l.</i> – Meters above sea level
Distance to settlement	<i>km</i> – Kilometers (a measure of remoteness)
Annual temperature	$^{\circ}\text{C}$ – Degrees Celsius
Annual precipitation	<i>mm</i> – Millimeter water equivalents
Max number of visitors	<i>Number</i> – Number accommodated at or nearby station
Area under roof	m^2 – Square meters
Disciplines studied	<i>Number</i> (number of discipline groups studied at station out of the 25 discipline groups described in the INTERACT Station Catalogue)

---------------------	-------

RUSSIA

Orotuk Field Station

Opening year	1992
--------------	------

Northern latitude	62°03' N
-------------------	----------

Altitude of station	550 m a.s.l.
---------------------	--------------

Distance to settlement	10 km
------------------------	-------

Annual temperature	-10.9 °C
--------------------	----------

Annual precipitation	291 mm
----------------------	--------

Max number of visitors	4
------------------------	---

Area under roof	70 m ²
-----------------	-------------------

Disciplines studied	5/25
---------------------	------

RUSSIA

North-East Science Station

Opening year	1980
--------------	------

Northern latitude	68°73' N
-------------------	----------

Altitude of station	20 m a.s.l.
---------------------	-------------

Distance to settlement	5 km
------------------------	------

Annual temperature	-10.7 °C
--------------------	----------

Annual precipitation	221 mm
----------------------	--------

Max number of visitors	47
------------------------	----

Area under roof	1700 m ²
-----------------	---------------------

Disciplines studied	19/25
---------------------	-------

RUSSIA

Avachinsky Volcano Field Station

Opening year	1995
--------------	------

Northern latitude	53°15' N
-------------------	----------

Altitude of station	950 m a.s.l.
---------------------	--------------

Distance to settlement	20 km
------------------------	-------

Annual temperature	-3 °C
--------------------	-------

Annual precipitation	1200 mm
----------------------	---------

Max number of visitors	24
------------------------	----

Area under roof	150 m ²
-----------------	--------------------

Disciplines studied	11/25
---------------------	-------

RUSSIA

Meinypil'gyno Community Based Biological Station

Opening year	2001
--------------	------

Northern latitude	62°32' N
-------------------	----------

Altitude of station	11 m a.s.l.
---------------------	-------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-7.4 °C
--------------------	---------

Annual precipitation	500 mm
----------------------	--------

Max number of visitors	14
------------------------	----

Area under roof	500 m ²
-----------------	--------------------

Disciplines studied	4/25
---------------------	------

KYRGYZ REPUBLIC

Adygine Research Station

Opening year	2008
--------------	------

Northern latitude	42°30' N
-------------------	----------

Altitude of station	3600 m a.s.l.
---------------------	---------------

Distance to settlement	8 km
------------------------	------

Annual temperature	-1 °C
--------------------	-------

Annual precipitation	600 mm
----------------------	--------

Max number of visitors	16
------------------------	----

Area under roof	49 m ²
-----------------	-------------------

Disciplines studied	11/25
---------------------	-------

ALASKA, USA

Barrow Arctic Research Center / Barrow Environmental Observatory

Opening year	1992
--------------	------

Northern latitude	71°18' N
-------------------	----------

Altitude of station	5 m a.s.l.
---------------------	------------

Distance to settlement	5 km
------------------------	------

Annual temperature	-12.6 °C
--------------------	----------

Annual precipitation	115 mm
----------------------	--------

Max number of visitors	75
------------------------	----

Area under roof	2500 m ²
-----------------	---------------------

Disciplines studied	16/25
---------------------	-------

ALASKA, USA

Toolik Field Station

Opening year	1975
--------------	------

Northern latitude	68°37' N
-------------------	----------

Altitude of station	720 m a.s.l.
---------------------	--------------

Distance to settlement	210 km
------------------------	--------

Annual temperature	-8.7 °C
--------------------	---------

Annual precipitation	318 mm
----------------------	--------

Max number of visitors	150
------------------------	-----

Area under roof	5546 m ²
-----------------	---------------------

Disciplines studied	18/25
---------------------	-------

CANADA

Kluane Lake Research Station

Opening year	1961
--------------	------

Northern latitude	61°01' N
-------------------	----------

Altitude of station	793 m a.s.l.
---------------------	--------------

Distance to settlement	65 km
------------------------	-------

Annual temperature	-3.8 °C
--------------------	---------

Annual precipitation	280 mm
----------------------	--------

Max number of visitors	30
------------------------	----

Area under roof	1100 m ²
-----------------	---------------------

Disciplines studied	20/25
---------------------	-------

CANADA

Western Arctic Research Centre

Opening year	1964
--------------	------

Northern latitude	68°21' N
-------------------	----------

Altitude of station	15 m a.s.l.
---------------------	-------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-8.2 °C
--------------------	---------

Annual precipitation	241 mm
----------------------	--------

Max number of visitors	99
------------------------	----

Area under roof	1320 m ²
-----------------	---------------------

Disciplines studied	22/25
---------------------	-------

CANADA

Canadian High Arctic Research Station

Opening year	2017
--------------	------

Northern latitude	69°07' N
-------------------	----------

Altitude of station	20 m a.s.l.
---------------------	-------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-13.9 °C
--------------------	----------

Annual precipitation	142 mm
----------------------	--------

Max number of visitors	48
------------------------	----

Area under roof	7000 m ²
-----------------	---------------------

Disciplines studied	20/25
---------------------	-------

CANADA

M'Clintock Channel Polar Research Cabins

Opening year	2009
--------------	------

Northern latitude	68°37' N
-------------------	----------

Altitude of station	0 m a.s.l.
---------------------	------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-5.7 °C
--------------------	---------

Annual precipitation	191 mm
----------------------	--------

Max number of visitors	20
------------------------	----

Area under roof	150 m ²
-----------------	--------------------

Disciplines studied	1/25
---------------------	------

CANADA

Flashline Mars Arctic Research Station

Opening year	2001
--------------	------

Northern latitude	75°25' N
-------------------	----------

Altitude of station	60 m a.s.l.
---------------------	-------------

Distance to settlement	145 km
------------------------	--------

Annual temperature	-16 °C
--------------------	--------

Annual precipitation	200 mm
----------------------	--------

Max number of visitors	7
------------------------	---

Area under roof	60 m ²
-----------------	-------------------

Disciplines studied	20/25
---------------------	-------

CANADA

Polar Environment Atmospheric Research Laboratory

Opening year	2005
--------------	------

Northern latitude	80°03' N
-------------------	----------

Altitude of station	610 m a.s.l.
---------------------	--------------

Distance to settlement	500 km
------------------------	--------

Annual temperature	-18.8 °C
--------------------	----------

Annual precipitation	183 mm
----------------------	--------

Max number of visitors	40
------------------------	----

Area under roof	704 m ²
-----------------	--------------------

Disciplines studied	9/25
---------------------	------

CANADA

CEN Ward Hunt Island Research Station

Opening year	1998
--------------	------

Northern latitude	83°06' N
-------------------	----------

Altitude of station	5 m a.s.l.
---------------------	------------

Distance to settlement	800 km
------------------------	--------

Annual temperature	-17.3 °C
--------------------	----------

Annual precipitation	150 mm
----------------------	--------

Max number of visitors	9
------------------------	---

Area under roof	50 m ²
-----------------	-------------------

Disciplines studied	19/25
---------------------	-------

CANADA

CEN Bylot Island Field Station

Opening year	1989
--------------	------

Northern latitude	73°08' N
-------------------	----------

Altitude of station	20 m a.s.l.
---------------------	-------------

Distance to settlement	85 km
------------------------	-------

Annual temperature	-15 °C
--------------------	--------

Annual precipitation	220 mm
----------------------	--------

Max number of visitors	18
------------------------	----

Area under roof	132 m ²
-----------------	--------------------

Disciplines studied	15/25
---------------------	-------

NUNAVUT/CANADA

Igloolik Research Center

Opening year	1975
--------------	------

Northern latitude	69°22' N
-------------------	----------

Altitude of station	23 m a.s.l.
---------------------	-------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-13.6 °C
--------------------	----------

Annual precipitation	286 mm
----------------------	--------

Max number of visitors	12
------------------------	----

Area under roof	100 m ²
-----------------	--------------------

Disciplines studied	6/25
---------------------	------

CANADA

CEN Salluit Research Station

Opening year	2011
--------------	------

Northern latitude	62°12' N
-------------------	----------

Altitude of station	35 m a.s.l.
---------------------	-------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-3 °C
--------------------	-------

Annual precipitation	550 mm
----------------------	--------

Max number of visitors	9
------------------------	---

Area under roof	50 m ²
-----------------	-------------------

Disciplines studied	22/25
---------------------	-------

CANADA

CEN Boniface River Field Station

Opening year	1988
--------------	------

Northern latitude	57°45' N
-------------------	----------

Altitude of station	100 m a.s.l.
---------------------	--------------

Distance to settlement	130 km
------------------------	--------

Annual temperature	-4 °C
--------------------	-------

Annual precipitation	500 mm
----------------------	--------

Max number of visitors	9
------------------------	---

Area under roof	50 m ²
-----------------	-------------------

Disciplines studied	14/25
---------------------	-------

CANADA

CEN Umiujaq Research Station

Opening year	2011
--------------	------

Northern latitude	56°33' N
-------------------	----------

Altitude of station	5 m a.s.l.
---------------------	------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-3 °C
--------------------	-------

Annual precipitation	550 mm
----------------------	--------

Max number of visitors	9
------------------------	---

Area under roof	50 m ²
-----------------	-------------------

Disciplines studied	22/25
---------------------	-------

CANADA

CEN Whapmagoostui- Kuujuarapik Research Station

Opening year	1971
--------------	------

Northern latitude	55°16' N
-------------------	----------

Altitude of station	50 m a.s.l.
---------------------	-------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-4 °C
--------------------	-------

Annual precipitation	648 mm
----------------------	--------

Max number of visitors	28
------------------------	----

Area under roof	5860 m ²
-----------------	---------------------

Disciplines studied	22/25
---------------------	-------

CANADA

CEN Radisson Ecological Research Station

Opening year	1999
--------------	------

Northern latitude	53°47' N
-------------------	----------

Altitude of station	135 m a.s.l.
---------------------	--------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-3 °C
--------------------	-------

Annual precipitation	684 mm
----------------------	--------

Max number of visitors	28
------------------------	----

Area under roof	5860 m ²
-----------------	---------------------

Disciplines studied	20/25
---------------------	-------

CANADA

CEN Clearwater Lake Research Station

Opening year	2005
--------------	------

Northern latitude	56°20' N
-------------------	----------

Altitude of station	224 m a.s.l.
---------------------	--------------

Distance to settlement	135 km
------------------------	--------

Annual temperature	-3 °C
--------------------	-------

Annual precipitation	550 mm
----------------------	--------

Max number of visitors	11
------------------------	----

Area under roof	50 m ²
-----------------	-------------------

Disciplines studied	19/25
---------------------	-------

CANADA

Nunavut Research Institute

Opening year	1997
--------------	------

Northern latitude	63°45' N
-------------------	----------

Altitude of station	50 m a.s.l.
---------------------	-------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-9.5 °C
--------------------	---------

Annual precipitation	404 mm
----------------------	--------

Max number of visitors	30
------------------------	----

Area under roof	1675 m ²
-----------------	---------------------

Disciplines studied	21/25
---------------------	-------

CANADA

Uapiska Research Station

Opening year	2016
--------------	------

Northern latitude	51°27' N
-------------------	----------

Altitude of station	359 m a.s.l.
---------------------	--------------

Distance to settlement	336 km
------------------------	--------

Annual temperature	-2.3 °C
--------------------	---------

Annual precipitation	974 mm
----------------------	--------

Max number of visitors	42
------------------------	----

Area under roof	353 m ²
-----------------	--------------------

Disciplines studied	10/25
---------------------	-------

CANADA

Labrador Institute Research Station

Opening year	1978
--------------	------

Northern latitude	53°31' N
-------------------	----------

Altitude of station	21 m a.s.l.
---------------------	-------------

Distance to settlement	0 km
------------------------	------

Annual temperature	0 °C
--------------------	------

Annual precipitation	940 mm
----------------------	--------

Max number of visitors	50
------------------------	----

Area under roof	1400 m ²
-----------------	---------------------

Disciplines studied	20/25
---------------------	-------

GREENLAND

Arctic Station

Opening year	1906
--------------	------

Northern latitude	69°15' N
-------------------	----------

Altitude of station	20 m a.s.l.
---------------------	-------------

Distance to settlement	1 km
------------------------	------

Annual temperature	-3.2 °C
--------------------	---------

Annual precipitation	436 mm
----------------------	--------

Max number of visitors	26
------------------------	----

Area under roof	955 m ²
-----------------	--------------------

Disciplines studied	25/25
---------------------	-------

GREENLAND

Greenland Institute of Natural Resources

Opening year	1998
--------------	------

Northern latitude	64°11' N
-------------------	----------

Altitude of station	50 m a.s.l.
---------------------	-------------

Distance to settlement	0 km
------------------------	------

Annual temperature	-0.9 °C
--------------------	---------

Annual precipitation	782 mm
----------------------	--------

Max number of visitors	36
------------------------	----

Area under roof	1850 m ²
-----------------	---------------------

Disciplines studied	19/25
---------------------	-------

GREENLAND

Sermilik Research Station

Opening year	1970
--------------	------

Northern latitude	65°40' N
-------------------	----------

Altitude of station	15 m a.s.l.
---------------------	-------------

Distance to settlement	20 km
------------------------	-------

Annual temperature	-1.7 °C
--------------------	---------

Annual precipitation	984 mm
----------------------	--------

Max number of visitors	6
------------------------	---

Area under roof	100 m ²
-----------------	--------------------

Disciplines studied	16/25
---------------------	-------

GREENLAND

Summit Station

Opening year	1989
--------------	------

Northern latitude	72°35' N
-------------------	----------

Altitude of station	3210 m a.s.l.
---------------------	---------------

Distance to settlement	593 km
------------------------	--------

Annual temperature	-31 °C
--------------------	--------

Annual precipitation	200 mm
----------------------	--------

Max number of visitors	50
------------------------	----

Area under roof	758 m ²
-----------------	--------------------

Disciplines studied	15/25
---------------------	-------

GREENLAND

EGRIP Field Station

Opening year	2015
--------------	------

Northern latitude	75°38' N
-------------------	----------

Altitude of station	2708 m a.s.l.
---------------------	---------------

Distance to settlement	690 km
------------------------	--------

Annual temperature	-29 °C
--------------------	--------

Annual precipitation	100 mm
----------------------	--------

Max number of visitors	20
------------------------	----

Area under roof	625 m ²
-----------------	--------------------

Disciplines studied	11/25
---------------------	-------

GREENLAND

Zackenberg Research Station

Opening year	1995
--------------	------

Northern latitude	74°28' N
-------------------	----------

Altitude of station	38 m a.s.l.
---------------------	-------------

Distance to settlement	450 km
------------------------	--------

Annual temperature	-9.2 °C
--------------------	---------

Annual precipitation	200 mm
----------------------	--------

Max number of visitors	31
------------------------	----

Area under roof	940 m ²
-----------------	--------------------

Disciplines studied	23/25
---------------------	-------

GREENLAND

Villum Research Station

Opening year	1990
--------------	------

Northern latitude	81°36' N
-------------------	----------

Altitude of station	30 m a.s.l.
---------------------	-------------

Distance to settlement	800 km
------------------------	--------

Annual temperature	-16.9 °C
--------------------	----------

Annual precipitation	188 mm
----------------------	--------

Max number of visitors	24
------------------------	----

Area under roof	600 m ²
-----------------	--------------------

Disciplines studied	13/25
---------------------	-------

ICELAND

Sudurnes Science and Learning Center

Opening year	2012
--------------	------

Northern latitude	64°02' N
-------------------	----------

Altitude of station	3 m a.s.l.
---------------------	------------

Distance to settlement	0 km
------------------------	------

Annual temperature	4.7 °C
--------------------	--------

Annual precipitation	1092 mm
----------------------	---------

Max number of visitors	24
------------------------	----

Area under roof	1470 m ²
-----------------	---------------------

Disciplines studied	5/25
---------------------	------

ICELAND

Litla-Skard

Opening year	1996
Northern latitude	64°43' N
Altitude of station	115 m a.s.l.
Distance to settlement	25 km
Annual temperature	3.1 °C
Annual precipitation	740 mm
Max number of visitors	6
Area under roof	0 m ²
Disciplines studied	8/25

ICELAND

Kárhóll Research Station

Opening year	2017
--------------	------

Northern latitude	65°43' N
-------------------	----------

Altitude of station	108 m a.s.l.
---------------------	--------------

Distance to settlement	5 km
------------------------	------

Annual temperature	6.3 °C
--------------------	--------

Annual precipitation	450 mm
----------------------	--------

Max number of visitors	20
------------------------	----

Area under roof	760 m ²
-----------------	--------------------

Disciplines studied	11/25
---------------------	-------

ICELAND

RIF Field Station

Opening year	2014
--------------	------

Northern latitude	66°31' N
-------------------	----------

Altitude of station	1 m a.s.l.
---------------------	------------

Distance to settlement	0 km
------------------------	------

Annual temperature	3.4 °C
--------------------	--------

Annual precipitation	650 mm
----------------------	--------

Max number of visitors	8
------------------------	---

Area under roof	66 m ²
-----------------	-------------------

Disciplines studied	11/25
---------------------	-------

ICELAND

Skálanes

Opening year	2005
--------------	------

Northern latitude	66°15' N
-------------------	----------

Altitude of station	15 m a.s.l.
---------------------	-------------

Distance to settlement	17 km
------------------------	-------

Annual temperature	5.3 °C
--------------------	--------

Annual precipitation	1649 mm
----------------------	---------

Max number of visitors	30
------------------------	----

Area under roof	350 m ²
-----------------	--------------------

Disciplines studied	15/25
---------------------	-------

FAROE ISLANDS

Faroe Islands Nature Investigation

Opening year	1999
--------------	------

Northern latitude	62°04' N
-------------------	----------

Altitude of station	725 m a.s.l.
---------------------	--------------

Distance to settlement	15 km
------------------------	-------

Annual temperature	6.5 °C
--------------------	--------

Annual precipitation	1284 mm
----------------------	---------

Max number of visitors	20
------------------------	----

Area under roof	0 m ²
-----------------	------------------

Disciplines studied	10/25
---------------------	-------

SCOTLAND, UNITED KINGDOM

ECN Cairngorms

Opening year	1998
--------------	------

Northern latitude	57°07' N
-------------------	----------

Altitude of station	700 m a.s.l.
---------------------	--------------

Distance to settlement	10 km
------------------------	-------

Annual temperature	5 °C
--------------------	------

Annual precipitation	835 mm
----------------------	--------

Max number of visitors	80
------------------------	----

Area under roof	0 m ²
