

WP1 – Coordination and Management

Margareta Johansson, Katharina Beckmann and Luisella Bianco

WP 1 Tasks

- T1.1** Provide general co-ordination and administration 
- T1.2 Provide specific decision-making coordination with the help of internal and external advisory bodies
- T1.3 Expand and develop the existing INTERACT web site into a state-of-the-art web portal
- T1.4 Coordination of the outreach from other work packages
- T1.5 Convene Annual Consortium Meetings
- T1.6 Conduct project monitoring
- T1.7 Training for partners to operate management tools and procedures
- T1.8 Prepare a road map for long term sustainability of INTERACT

Milestones reached and deliverables delivered

14 milestones and have been reached
7 deliverables have been delivered to EU

Amendment to the Grant Agreement

This summer to change bank account for Lund University

Currently to include our last partner in the project - ICR

The screenshot shows the 'Participant Portal - Grant Management Services' for the European Commission. The user is logged in as 'Margareta JOHANSSON'. The main section is titled 'MY PROJECT' and displays details for 'HORIZON 2020' project 'H2020-INFRAIA-2016-1'. The project details include: Type of Action: RIA, Acronym: INTERACT, Current Phase: Grant Management, Number: 730938, and Duration: 48 months. A timeline shows the project status: 'Launched' (02 Oct 2017), 'Prepared', 'Submitted', 'Admissible', and 'Decision'. A 'Consortium Requested Amendment' (AMD-730938-14) is shown with a 'Cancel amendment' button. Below the timeline, there are three tasks: 'Amendment preparation' (with a warning icon), 'Grant Declaration signature by other beneficiaries', and 'Grant Accession signature by other beneficiaries'. Buttons for 'Consult Officer' and 'Lock for review' are visible.

Welcome to INTERACT – International Network for Terrestrial Research and Monitoring in the Arctic

INTERACT is an infrastructure project under the auspices of SCANNET, a circumarctic network of currently 83 terrestrial field bases in northern Europe, Russia, US, Canada, Greenland, Iceland, the Faroe Islands and Scotland as well as stations in northern alpine areas. INTERACT specifically seeks to build capacity for research and monitoring in the European Arctic and beyond, and is offering access to numerous research stations through the [Transnational Access](#) program.

INTERACT Foundation

Confidential
13/09/17

INTERACT FOUNDATION creating an international non-profit organization

What is INTERACT?

INTERACT is a highly successful network of more than 80 terrestrial research stations in the Arctic and far north that annually hosts around 3000 researchers from around the World. It provides coordination and infrastructure for research and monitoring and is providing access to the Arctic for hundreds of scientists from the global community. It is the major research infrastructure network on land in the North and has global recognition!

Why create an INTERACT Foundation?

INTERACT operates in an area of the World which is experiencing the most rapid environmental and sociological changes that have far-reaching implications of global concern. INTERACT is a time limited project mainly funded by the EU but with contributions from Canada and US. INTERACT has operated since 2001 but each four years a re-submission to continue the project is required and long-term funding is uncertain. The long-term function of the infrastructure is critical as the processes underpinning environmental change in the North need to be interpreted in a long-term context and future observations are essential because of the rapid rate of unpredictable change. We therefore seek a way in which INTERACT can continue to play a major global role based on new funding sources.

What do we want to do?

It is important to many sectors of society, including the research community, northern populations, industry, decision makers and the general public that INTERACT's work continues without interruptions and without major uncertainties. We therefore seek to create a funding model based on a foundation that allows INTERACT to seek funding internationally and to continue its major roles of:

- Supporting and facilitating research groups to access the Arctic and northern areas in general
- Supporting and facilitating the networking of northern research stations to improve sharing of data, experience, standardized observations and human capital
- Providing a one stop shop for the Arctic to the global science community including researchers, scientific programmes, networks and organisations
- To make decision makers, local peoples and the global community aware of climate change and environmental issues in the Arctic
