New testing area launched in Sodankylä

The Finnish Meteorological Institute has launched intelligent traffic systems, advanced road weather services and a 5G network in Sodankylä. The test environment is a joint effort between the Finnish Meteorological Institute, Valtion Teknillinen centre, Nokia and Renault. The testing area will be in operation until late autumn and will include multiple traffic scenarios to test the intelligent traffic systems. The testing area will also be used for research purposes. The project is part of the national roadmap for digitalization and 5G technology development in Finland.

Meetings where INTERACT was present

The INTERACT TA User Community Workshop on Drones was held in February 2018. The workshop was attended by researchers from research stations in the Arctic and sub-Arctic regions. The workshop focused on the use of drones for research in the Arctic and the challenges and opportunities associated with drone research. The workshop also discussed the potential of drones for monitoring the cryosphere and improving our understanding of Arctic change.

The third Station Managers Forum was held in March 2018. The forum was attended by researchers from research stations in the Arctic and sub-Arctic regions. The forum discussed the best practices related to research stations, including the use of drones for research in the Arctic. The forum also discussed the role of research stations in the Arctic and the challenges and opportunities associated with station management.

The INTERACT TA User Community Workshop on Zero Emission Research Stations was held in April 2018. The workshop was attended by researchers from research stations in the Arctic and sub-Arctic regions. The workshop focused on the use of zero emission technologies for research in the Arctic and the challenges and opportunities associated with zero emission research. The workshop also discussed the potential of zero emission technologies for monitoring the cryosphere and improving our understanding of Arctic change.

New INTERACT website launched

The INTERACT website has been launched. The website is designed to support the INTERACT network and provide information on the latest activities. The website includes a TA call information section, which provides information on the latest calls for research funding and networking opportunities. The website also includes a section on INTERACT Ambassadors, which provides information on the latest activities of the INTERACT Ambassadors. The website also includes a section on INTERACT Arctic Research Blogs, which provides information on the latest research in the Arctic.
