

## Integrating Activities for Advanced Communities

### D12.2- POPD – Requirement No. 2

Project No.871120– INTERACT

H2020-INFRAIA-2019-1

Start date of project: 2020/01/01

Duration: 48 months

Due date of deliverable: 2020/02/29 (M2)

Actual Submission date: 2020/03/09

Lead partner for deliverable: Lund University

Author: Margareta Johansson

Dissemination Level		
PU	Public	X
PP	Restricted to other programme participants (including the Commission Services)	
RE	Restricted to a group specified by the Consortium (including the Commission Services)	
CO	Confidential, only for members of the Consortium (including the Commission Services)

**Publishable Executive Summary..... 3**

**1. Introduction..... 4**

1.1. Data Protection Officer at Lund University .....4

1.2. INTERACT GDPR Guidelines .....4

## **Publishable Executive Summary**

When GDPR was introduced in 2018, Lund University hired a Data Protection Officer (DPO) that can be consulted at any time on issues related to GDPR. INTERACT produced a report in collaboration with the DPO to guide the project's members how to deal with personal data that was related to the project.

## 1. Introduction

### **1.1. Data Protection Officer at Lund University**

Lund University has a Data Protection Officer that can be contacted via email: [dataskyddsbud@lu.se](mailto:dataskyddsbud@lu.se) or by phone: 046-222 00 00. Lund University also has a specific part of its web site devoted to GDPR that is available in Swedish and in English and can be found here:

<https://www.lunduniversity.lu.se/about/contact-us/processing-of-personal-data-at-lund-university>

### **1.2. INTERACT GDPR Guidelines**

In 2018 when GDPR was introduced, INTERACT produced a report containing guidelines for its users how to deal with personal information in collaboration with Lund University's Data Protection Officer. The report is available on INTERACT's web site at:

<https://eu-interact.org/app/uploads/2018/09/INTERACT-and-GDPR.pdf>

and is available on the next page.

# 1. What is INTERACT?

INTERACT is a circumarctic network of more than 80 terrestrial field bases in all Arctic countries and adjacent high alpine and forested areas. INTERACT is building capacity for identifying, understanding, predicting and responding to diverse environmental changes throughout the wide environmental and land-use envelopes of the Arctic.

INTERACT arose from the SCANNET network which started in 2001. The network grew from a network of 9 research stations around the north Atlantic to a pan-Arctic advanced infrastructure project within the EU Horizon2020 programme. The project provides Transnational Access to 43 research stations throughout the Arctic. The physical transnational access is complemented with virtual (free access to metadata and data collected by the research stations) and remote (observations carried out by station staff) access. A Station Managers' Forum ensures best practices in e.g. safety at research stations and reducing emissions from research stations. Joint research activities develop standardized monitoring schemes for biodiversity, drone technology in the field, local adaptation schemes and procedures for action when a hazard occurs. Guidelines for storing real data are developed through our Data Forum.

## 2. What is GDPR?

The EU General Data Protection Regulation (GDPR) purpose is to harmonize data privacy laws across Europe, to protect and empower all EU citizens' data privacy, and to reshape the way organizations across the region approach data privacy.

The GDPR applies to 'personal data' meaning any information relating to an identifiable person who can be directly or indirectly identified in particular by reference to an identifier. This includes, for instance: name, surname, home address, e-mail address or location data from the map on your mobile. Typically, the data you might hold on your employees, your clients and your suppliers.

The GDPR applies on all handling of personal data such as how to collect, handle, store and delete the data.

## 3. Aim of this document

The aim of this document is to ensure that INTERACT follows GDPR and to let users of INTERACT know how we do this. The aim is both to be a guideline to those working with the INTERACT tasks involving personal data collection and processing, and an information to those whose personal data is involved.

## 4. Key GDPR principles

The GDPR recommendations can be summarized into three general points:

- Collect personal data with a clearly defined purpose and don't use it for something else
- Don't collect more data than you need
- Delete data that is no longer used

Personal data shall be handled with consideration to six principles (Figure 1).

Figure 1. The six principles that provide good guidelines on how to handle personal data

# 5. When is GDPR relevant for INTERACT and how do we deal with it?

INTERACT processes personal data in order to fulfill the project assignment. The legal ground is that it is in the **public interest** under the EU legislation or national legislation (Ref EU).

We have identified six categories when GDPR is relevant for INTERACT. A summary can be found in Appendix I and more details follow in the sections below.

## 5.1 INTERACT General administration

### 5.1.1 What data is affected?

- Contact lists for stations (name, email address, postal address, phone number)
- Mailing lists (newsletter)
  - Consent is required to send newsletter to external receivers only. TA/RA applicants are external receivers, all others within INTERACT can be considered internal receivers and don't require a consent.
- Email handling (upcoming LU directive autumn 2018 according to Lund DPO)

### 5.1.2 INTERACT solution

#### Data collection

Data for internal subjects is collected directly from the subject or from subjects' manager or work colleague within the same INTERACT partner agreement

Data for external subjects is always collected directly from the subject

In the collection/registration procedure:

- Keep registered information to a minimum with a clear purpose
- Inform subject on why the data is collected (if not obvious)
- Inform subject on who will have access to/receive/handle the information
- Inform subject on how long the information will be stored
- Collect consent from external subjects (e.g. newsletter receivers)

#### Data process/handling

- Newsletters and other e-mails with multiple external receivers are to be sent in the "Secret copy" / bcc field.
- Newsletters should contain information about how to unsubscribe from the newsletter.

#### Data storing and deleting

- Personal lists, mailing lists/ overviews should be stored password protected in a GDPR compliant data storage, like Google Drive or Dropbox
- All lists should be kept up to date and deleted when no longer used

- Contact information regarding who is responsible for the collection, update and removal of personal identifiable information should be clearly communicated on the INTERACT website
- Requests to provide information about, update or remove personal identifiable information from personal lists / mailing lists should be acted upon within stated timeframe

## ***5.2 INTERACT Internal Management Tool - Progeta (INTERACT.PROGETA.INFO)***

### **5.2.1 What data is affected?**

- Project participants' name, email address

### **5.2.2 INTERACT solution**

#### Data collection

Data is always collected directly from the subject

In the collection/registration procedure:

- Keep registered information to a minimum with a clear purpose
- Inform subject on why the data is collected (if not obvious)
- Inform subject on who will have access/receive/handle the information
- Inform subject on how long the information will be stored

#### Data processing/handling

- Only WP leaders, Tasks leaders (when different from WP leader) and Deliverable's responsible will have a user id.
- Other project participants only need a quick view of the project status and they will use an anonymous View-Only user id.
- Updates about project advancement (deliverable approved, milestone reached) should be sent to the Interact mailing list in the newsletter

#### Data storing and deleting

- Personal lists, mailing lists/ overviews should be stored password protected in a GDPR compliant data storage, like Google Drive or Dropbox
- All lists should be kept up to date and deleted when no longer used

## ***5.3 INTERACT Web site (EU-INTERACT.ORG)***

### **5.3.1 What data is affected?**

- Photos
- Contact information
- About/People (Photo, Name, Email)
- About/Pool of expertise (Name)
- About/Bulletin board (Photo, Name)
- Field Stations (Contact details: Name, Email, Phone number; Photos)
- News (Photo, Contact details)

- Media (Film)
- Gallery (Photos)

### 5.3.2 INTERACT solution

#### Data collection

Contact information, personal data and photo for internal subjects is collected directly from the subject or from subjects' manager or work colleague within the same INTERACT partner agreement

In the collection/registration/update procedure:

- Keep registered information to a minimum with a clear purpose
- Inform subject why the data is collected (if not obvious)
- Inform subject who will have access/receive/handle the information
- Inform subject how long the information will be stored

#### Photo/film

- When taking photos / film including pictures where people can be identified the subject should be informed about the intended use / publication of the photo / film and have the option not to be in the picture. This can be done in the invitation, information about the event or similar type of communication.
- For pictures with identifiable people there are 3 categories defined with different levels of need for consent (Ref Lund University); News-, Mingle- and Genre pictures:
  - News pictures (No consent needed); All people included are relevant, known and informed about the handling of the pictures. E.g. interviewees, spokesperson, speaker on a conference, researcher conducting field work.
  - Mingle pictures (No consent needed): Information provided to get an insight in the business. E.g. pictures from a conference, coffee break during a public presentation, pictures of a crowd from graduation.
  - Genre pictures (Consent required): All pictures where the people can be replaced. E.g. students, scientists, teacher giving a class if the picture is used to provide a general description.
- For pictures to be identifiable means that a person can be recognized and identified. E.g. a guard standing half hidden behind the prime minister can be recognized and identified. A person pictured from behind is not identifiable even if a haircut or clothing means that he/she is identifiable by many.
- Photos / films including identifiable persons is the responsibility of the photographer to secure consent from and/or inform the subject. INTERACT is responsible to inform the photographer about their responsibility

#### Data process/handling

##### **Contact Us page**

- Listed Contact person should always be a person whose work assignment includes being a contact person. This means no written consent is needed to publish relevant contact information on the web. (The contact person should be informed before being listed.)

#### Data storing and deleting

- Information on how to contact the responsible for what is published on the web and request information about, update to and removal (if valid) of personal identifiable information should be clearly communicated on the website
- Requests to provide information about, update or remove (if valid) personal identifiable information on the website should be acted upon within stated timeframe

## 5.4 INTERACT Social media channels

### 5.4.1 What data is affected?

- Photo
- Name

### 5.4.2 INTERACT solution

#### Data collection

Contact- and Personal Data are always collected directly from the subject

- When taking photos / film including pictures where people can be identified then subject should be informed about the intended use / publication of the photo / film and have the option not to be in the picture. This can be done in the invitation, information about or similar type of communication.
- For pictures with identifiable people there are 3 categories defined with different level of need for consent (Ref Lund University); News-, Mingle- and Genre pictures:
  - News pictures (No consent needed); All people included are relevant, known and informed about the handling of the pictures. E.g. interviewees, spokesperson, speaker on a conference, researcher conducting field work.
  - Mingle pictures (No consent needed): Information provided to get an insight in the business. E.g. pictures from a conference, coffee break during a public presentation, pictures of a crowd from graduation.
  - Genre pictures (Consent required): All pictures where the people can be replaced. E.g. students, scientists, teacher giving a class if the picture is used to provide a general description.

#### Data process/handling

- For pictures to be identifiable means that a person can be recognized and identified. E.g. a guard standing half hidden behind the prime minister can be recognized and identified. A person pictured from behind is not identifiable even if a haircut or clothing means that he/she is identifiable by many.
- Photos / films including identifiable persons is the responsibility of the photographer to secure consent from and/or information to the subject. INTERACT is responsible to inform the photographer about their responsibility.

#### Data storing and deleting

- Contact information regarding who is responsible for the content published on each channel, and also the collection, update and removal of personal identifiable information should be clearly communicated on each channel respectively
- Requests to provide information about, update or remove personal identifiable information on the website should be acted upon within stated timeframe

### 5.5 *INTERACT Meetings*

#### 5.5.1 What data is affected?

- contact details
- dietary preferences
- copy of passport for invitation letters/visa process
- photos taken at the meeting; speakers, group/mingle pictures

#### 5.5.2 INTERACT solution

##### Data collection

Contact- and Personal Data are always collected directly from the subject

In the invitation letter/registration procedure:

- Keep registered information to a minimum with a clear purpose
- Inform subject why the data is collected (if not obvious)
- Inform subject who will have access/receive/handle the information
- Inform subject how long the information will be stored
- Inform about intended photo and filming on the meeting and the intended used of the photos/films

##### Data process/handling

- Create participants lists only with minimum Participant details; Name, Organization, Email address
- Send out / share participant lists limited to those informed about when collecting the information
- Create and print name tags and participation lists with minimum Participant information. Store printed material in a secure way
- Publish and share photos/films only within the defined scope during data collection

##### Data storing and deleting

- Registration form / overview should be password protected
- Photos / films, personal lists, mailing lists/overviews should be stored password protected in a GDPR compliant data storage, like Google Drive or Dropbox
- Don't store any copy of passports, Forward the incoming mail, Delete the incoming email. Keep the sent email temporarily for admin backup. Delete sent email within stated timeframe after the Meeting was completed.

- Delete sensitive data e.g. dietary preferences and passport copy within 2 months after the meeting
- Delete all files with Meeting registration data when Project is closed

## ***5.6 INTERACT TA/RA Application and Evaluation System (EU-INTERACCESS.ORG)***

### **5.6.1 What data is relevant?**

- Applicants details

### **5.6.2 INTERACT solution**

#### **Data collection**

- Contact- and Personal Data are always collected directly from the subject
- Keep registered information to a minimum with a clear purpose
- Inform subject why the data is collected (if not obvious)
- Inform subject who will have access/receive/handle the information
- Inform subject how long the information will be stored
- Collect consent to privacy policy, receive newsletters etc

#### **Data process/handling**

- Applicant details are accessed/received/handled by only those mentioned when collecting the data

#### **Data storing and deleting**

- Password protected in the cloud
- All applicants' data will be deleted within stated timeframe after the end of the project

## ***5.7 Other External Databases within the EU***

Other external databases within the EU that are used by the INTERACT project, e.g. INTERACT GIS, will follow their own guidelines regarding the GDPR.
