INTERACT sincerely hopes that all our readers and their families are healthy and safe during the ongoing crisis. We are aware that many of our readers and their communities are facing unprecedented challenges due to the coronavirus pandemic. We would like to assure you that INTERACT is committed to providing support and resources to help address these challenges. We are working closely with our partners and continuously updating our educational resources to meet the needs of our readers and their students.

INTERACT works closely with the UK charity Wicked Weather Watch, which provides free educational resources for primary school students and their teachers. These resources include lesson plans, activities, and webinars on specific topics such as glaciers and permafrost. They are available in English and Polish. Details of capacity and calls can be found at: wickedweatherwatch.org.uk/

INTERACT is committed to providing educational support to schools around the world during this difficult period. We are already surveying teachers around the World to learn what resources would be helpful to them and we shall also strive to be responsive to new requests during this difficult period. Please send any specific requests to INTERACT Secretariat at +46 46 222 0662 or Sölvegatan 12.

We are currently unable to host research or support personnel at the Toolik Field station due to the ongoing pandemic. The station announces that they are unable to provide field work support or accommodate guests in the spring and summer season. As soon as we receive information from the research stations we post it on the INTERACT website.

Remote Access means that the station staff would collect the samples and conduct the study for you, according to your request. Virtual Access (VA) means free access to stations databases through the INTERACT VA single entry point to discover what VA has to offer. The VA is being used by the Altai University in the absence of classes.

INTERACT is working with the University of the Arctic, a network of over 200 universities, and is producing free and widely available educational resources. These resources are experiencing disruption and schools are closed or are closed in many countries. The virus has severely disrupted education from universities to schools: one estimate suggests that 400 million students are affected by the pandemic and we have hence devoted this newsletter to inform about the ongoing situation and how INTERACT responds and is helping.

We wish a speedy and complete recovery. INTERACT is always available to those who have lost loved ones. For those who are ill, we are so affected by the pandemic and we have hence devoted this newsletter to inform about the ongoing situation and how INTERACT responds and is helping.

Due to the ongoing pandemic, many stations in the INTERACT Consortium have a limited supply of drugs and have limited transport. The British Antarctic Survey (BAS) will continue to monitor the Coronavirus situation throughout June will be canceled. The station will be closed to the end of June 2020. All existing reservations to the station have been transferred to the 2021 season. Details of capacity and calls can be found at: interact.org.arctic/interact.vlaarctic/ (deliverable D2.5)
