## D3.3 – Report on the role of INTERACT in a European Arctic research strategy

Project No.262693– INTERACT

**FP7-INFRASTRUCTURES-2010-1**

Start date of project: 01/01/2011  
Due date of deliverable: 30/06/2012

Duration: 48 months  
Actual Submission date: 30/06/2012

Lead partner for deliverable: NERI  
Authors: Morten Rasch

Dissemination Level		
<b>PU</b>	Public	X
<b>PP</b>	Restricted to other programme participants (including the Commission Services)	
<b>RE</b>	Restricted to a group specified by the Consortium (including the Commission Services)	
<b>CO</b>	Confidential, only for members of the Consortium (including the Commission Services)

## Publishable Executive Summary

Deliverable D3.3, i.e. 'Report on the role of INTERACT in a European Arctic research strategy' is slightly delayed. The background for the deliverable is Task 3.2 which sought to establish links to, and cooperate with other polar networking activities in the European Arctic, for example the ESFRI projects SIOS, LIFEWATCH and ICOS. Many contacts within Europe and beyond have already been established at the levels of individual research stations and regional and global monitoring networks (Deliverable 3.2). However, the work on the report planned within D3.3 is delayed and is still in progress. The INTERACT Consortium will discuss the advantages of postponing this deliverable (to e.g. to Month 30).

This is a deliberate strategy because INTERACT is playing an increasingly strong role in European (as well as pan-Arctic) Arctic research and many initiatives are in development but still not implemented. For example, the report is being coordinated with the work in progress on a similar deliverable in SIOS. Also, INTERACT is now cooperating with SIOS, SAON, GEO/GEOSS etc but its formal tasks and contributions are still being defined. It is suggested therefore, that it would be appropriate to postpone the publication of the Deliverable D3.3 report until more concrete developments have occurred within the collaborations already established and those expected to develop.

## 1. INTERACT's Role in a European Arctic Research Strategy

Deliverable D3.3, i.e. 'Report on the role of INTERACT in a European Arctic research strategy' is slightly delayed. The background for the deliverable is Task 3.2 which sought to establish links to, and cooperate with other polar networking activities in the European Arctic, for example the ESFRI projects SIOS, LIFEWATCH and ICOS. Many contacts within Europe and beyond have already been established at the levels of individual research stations and regional and global monitoring networks (Deliverable 3.2). However, the work on the report planned within D3.3 is delayed and is still in progress. The INTERACT Consortium will discuss the advantages of postponing this deliverable (to e.g. to Month 30).

This is a deliberate strategy because INTERACT is playing an increasingly strong role in European (as well as pan-Arctic) Arctic research and many initiatives are in development but still not implemented. For example, the report is being coordinated with the work in progress on a similar deliverable in SIOS. Also, INTERACT is now cooperating with SIOS, SAON, GEO/GEOSS etc but its formal tasks and contributions are still being defined. It is suggested therefore, that it would be appropriate to postpone the publication of the Deliverable D3.3 report until more concrete developments have occurred within the collaborations already established and those expected to develop.
