Progress

D1.13: Innovation monitoring plan (Month 10)

- To monitor innovation impact, several indicators have been identified in almost all WPs in collaboration with WP Leaders.
- Some of them aim to foster people awareness on Arctic themes, some others to improve process efficiency and service level to users, and some to involve as many new stakeholders as possible.

Progress

D1.17: INTERACT Data Policy

- a policy for how scientific datasets generated at the INTERACT stations are made available to the scientific community.
- directly related to the Virtual Access
- promotes free and ethical open data access to scientific datasets.
- INTERACT adopts the research data principles of H2020 Open Research Data Pilot and Horizon Europe that data are *“as open as possible, as closed as necessary”*.

Progress

INTERACT Non-profit Association (INPA)

- Long term sustainability to INTERACT
- Legal Entity
- Complement EU funding
- Apply for funding as a unit

Welcome to INTERACT – International Network for Terrestrial Research and Monitoring in the Arctic

INTERACT is an infrastructure project under the auspices of SCANNET, a circumarctic network of currently 89 terrestrial field bases in northern Europe, Russia, US, Canada, Greenland, Iceland, the Faroe Islands and Scotland as well as stations in northern alpine areas. INTERACT specifically seeks to build capacity for research and monitoring all over the Arctic, and is offering access to numerous research stations through the [Transnational Access Program](#).
