COVID 19, research stations and meetings - plenum

Station operations

How did/does COVID-19 affect your station operations?

Have you established mitigation plans for a possible new pandemic?

Have the COVID-19 situation learned you anything that could also be of use in a non-pandemic situation?

Do you have any experiences or smart procedures that you want to share?

Meetings

How did/does the COVID-19 related reduction of IRL meetings affect your station operations?

Have the COVID-19 related reduction in number of IRL meetings learned you anything that could also be relevant in a non-pandemic situation – also considering CO₂ emissions?

Do you have any experiences or smart procedures that you want to share?

Let's INTERACT
