

## Information for Applicants, INTERACT TA/RA Call

**Transnational Access (TA)** means free of charge, transnational access to research infrastructures or installations for selected user groups. The access includes the logistical, technological and scientific support and the specific training that is usually provided to external researchers using the infrastructure. **Remote Access (RA)** is a form of Transnational Access in which the user(s) do not visit the infrastructure/installation physically themselves; instead the staff of the infrastructure/installation is conducting the study/collecting the samples/doing the monitoring for the user(s) according to their research plan. It is also possible to combine Transnational Access and Remote Access in a manner, where users both visit physically the station and set up the required field experiments/monitoring, after which study continues by using Remote Access.

You can find detailed information about INTERACT Transnational Access and its different modalities from the INTERACT website at [www.eu-interact.org](http://www.eu-interact.org)

### INFRASTRUCTURES

There are altogether 39 research stations offering TA/RA currently in INTERACT III. You can find a listing of these infrastructures from [here](#). Detailed information about the station facilities can be found from the [Field Sites Descriptions](#) on the INTERACT website.

### ELIGIBILITY for Transnational Access

A user group (=research group that applies for access to one or more research stations) eligible for **Transnational Access** must satisfy the following conditions:

1. **Country of work and residency.** The user group leader and the majority of the users must work in a country other than the country(ies) where the installation is located; Trans-national access is not granted to an infrastructure/installation that is located in the same country where the user works. In other words, applicants are not eligible for TA to their national infrastructures, i.e. stations that are either located in the same country or operated by institutions located in the same country in which the applicant is working/residing. **For example:** Scientists working in Finland are not eligible for TA to Finnish research stations; Scientists working in Denmark are not eligible to Greenlandic research stations operated by Danish institutions, scientists working in UK are not eligible to UK Arctic Research Station in Svalbard, and so on.
2. **Justification of the research infrastructure where access is applied.** There should not be similar infrastructure in the country where the user group leader is working and residing. If such infrastructure exists, the applicant should demonstrate and provide a scientific and/or facility-based

justification on why the requested research cannot be done at the national infrastructure. **Note:** This also applies in cases where the applicant has a national infrastructure in the same location where access is applied such as in Ny-Ålesund, Svalbard.

3. **Dissemination of results.** Only user groups that are allowed to disseminate the results they have generated under the action may benefit from the access, unless the users are working for SME's.
4. **Research focus.** Access is only be granted to user groups to conduct research, not for arranging or attending courses, conferences, seminars or workshops. **The research supported should be focused on the terrestrial environment;** any other kind of research (e.g. marine or atmospheric) should demonstrate strong linkages to terrestrial realm in order to be granted INTERACT TA.

The selection of user groups is based on a scientific merit and novelty of the research, but taking into account that priority should be given to user groups composed of users who:

- Have not previously used the installation
- Are working in countries where no equivalent research infrastructure exists
- Apply working at more than one location for generating comparative studies
- Are early career scientists ( $\leq 5$  yrs from a PhD degree) \*\*

\*\*Applicants must hold a position at an institution of advanced research and/or education. PhD students and Master or Bachelor level students as main applicants (TA User Group leaders) are required to attach 1-2 signed recommendation letters by their academic supervisor and/or other relevant person to application.

The maximum amount of access granted to one user group is 90 days (3 months) in the INTERACT III funding period of 2020-2023, including both Transnational and Remote Access. Access for user groups with a majority of users not working in EU or associated countries is limited to 20% of the total amount of units of access provided under the grant. This is monitored and possible restrictions are set if the limit is close to be exceeded.

## **INTERACCESS ON-LINE APPLICATION SYSTEM**

- Fill in the application form carefully. Instructions how to fill in the application form and prepare the research plan are provided in the **Application Manual** and **Research Plan Instructions**, both available in [INTERACCESS](#) and in the [e-Library/info materials](#) webpage. Also read the budgeting instructions provided later in this document carefully.
- You can work on the application in several sessions and store the application in-between the sessions.

- The following attachments are compulsory in the application: Research plan, max. 2 page CV of the main applicant (=TA User Group Leader). PhD students and Master or Bachelor level students applying as TA User Group leaders are required to attach 1-2 signed recommendation letters by their academic supervisor and/or other relevant person to application.

## Research plan and CV

Research plan is a compulsory attachment to the application. It must follow the structure provided in the [Research Plan Instructions](#), and can be max. 6 pages in length. Research plans failing to follow the instructed structure and exceeding the length will be rejected from the evaluation. Pay special attention to providing information on research permits and specific logistic needs that are required by some stations (visa, import and export permits etc.), and what has been studied at the station previously. Consult [relevant station manager](#) or the [INTERACT Field Site Descriptions](#) about the required permits, if needed.

The page limit for the CV of the main applicant (=TA User Group leader) is 2 pages, and pages exceeding this limit will be not evaluated.

## BUDGETING

**Eligible costs:** Provide the tentative budget of your access visit in the section “Travel and logistics costs” of the on-line application form, by specifying the travel costs from your home institution to the station and back, accommodation en-route and possible freight and logistic costs according to Table 1 below. In most cases it is realistic to apply access for 1-3 group members. In some cases, 4-5 group members can be granted access, but this is rare and most often restricted to few, labor-intensive studies (coring etc).

**Accommodation and meals** during the stay at station should not be included into the budget in most cases (see Table 1), except for **Cairngorms** and **FINI** that do not provide accommodation at the station premises. Other exceptions are: **Sermilik**, **GINR Kobberfjord Field site** and **M&M Klapa**, where meals have to be cooked by the visitors themselves and food purchases will be reimbursed after the trip in the travel claims up to a reasonable amount (see details from the table below). **Arctic Station**, **Abisko**, **Finse**, **Kolari**, **Cairngorms**, **FINI**, **QAANAAQ**, **Sudurnes** and **CHARS** do not reimburse food costs at all, and meals costs are thus on the responsibility of the TA users themselves.

**Non-eligible costs:** The following costs are not eligible, and are NOT REIMBURSED by INTERACT Transnational Access. Therefore, do NOT include these in the budget: Insurance costs and personnel costs of any kind. Vaccination and health care costs. Daily allowances (per diems), km allowances, telephone and internet costs, purchase of equipment or chemicals, customs costs, meals and food purchases during journey to station and back, bar bills and other extra services at place of accommodation.

**COVID-19:** Do not include vaccination costs or quarantine costs into the budget. Vaccination costs are non-eligible costs and under the responsibility of the TA User him/herself. Quarantine costs will be added on top of the granted access days and travel budget by the TA Coordination, if needed, at the later stage.

**Remote Access:** Include only logistics costs (freight) into the budget, as in remote access the applicants will not be visiting the stations themselves and the station staff will do the sampling/monitoring and send the samples/data to the TA users.

**Table 1. Costs to be included to the “Travel and logistic costs” section of the on-line application form, specified here for each station offering Transnational Access.** Symbols: + Add to the “Travel and logistics costs” section of the application form; - Do NOT include into the “Travel and logistics costs” section of the application form (automatically included to the granted access); 0 Not reimbursed by INTERACT TA, do NOT include into the travel and logistics costs section of the application form.

## DISCLAIMER

Travel arrangements to INTERACT Transnational Access sites are the responsibility of the applicant. Should technical or logistical problems arise, the user groups should first contact the relevant Station Manager/Logistics Manager. Only in exceptional situations where the local personnel cannot help, should the INTERACT co-ordination be contacted. In these exceptional circumstances, the first contact will be Dr Hannele Savela, coordinator of the Transnational Access Workpackage.

INTERACT shall not be responsible for any injuries, damages, or losses caused to any user group member in connection with any Transnational Access given at the INTERACT Transnational Access sites. Transnational Access users shall be responsible for their own travel arrangements, have appropriate travel and health insurance and assume complete and full responsibility for any and all passport, visa, vaccination, currency exchange or other entry requirements of each destination, and all safety or security conditions at the Transnational Access sites during the length of their travel and stay.

All user group members must have an appropriate travel and health insurance, and be clear about the legal responsibilities of their employers. INTERACT has no liability to cover the insurance costs, or any extra costs of unforeseen circumstances related to travel (e.g. delays or cancellations), customs, shipment and logistics, nor has it legal responsibility for the health and welfare, including emergency and accident situations, of those who are awarded INTERACT Transnational Access.

By accepting these Terms of Service and applying for INTERACT Transnational Access you indicate that you have read and accepted our [Data Privacy Policy](#), [TA/RA Data Protection Policy](#) and agree with this Disclaimer.

## **APPLICATIONS TO STATIONS LOCATED IN COUNTRIES REQUIRING VISA**

Assistance and support are available to the accepted user groups for application of visas and required permits to stations. Please contact INTERACT TA Coordinator and relevant station managers for additional information.

## **EVALUATION AND SELECTION PROCEDURE**

The incoming applications are first checked for eligibility by the WP5 coordination. After that, the selection of user groups for Transnational Access (both physical Transnational Access and Remote Access) is a two-step process. First, the applications undergo scientific evaluation by the TA Selection Board that consists of external experts and representatives of INTERACT stations representing different geographical regions. Each application is graded for several evaluation criteria: Scientific quality of the planned research, scientific merits of the user group leader, relevance of the planned research for INTERACT goals, value for money. Each criteria is scored from 1-5, where 1=poor, 2=satisfactory, 3=average, 4=good, 5=excellent. Ranking of applications is made based on the total scores (max. 20) received from the criteria, and the TA Selection Board recommends user groups that they decide merit access to the research stations. The decisions are then finalized by the research stations, based on the TA Board's recommendations, feasibility of the projects at the station, station strategy etc. The recommendations to the stations, and access decisions to the applicants are communicated via the INTERACCESS system by the INTERACT Transnational Access Coordination, that does not take part in the evaluation and selection process of individual applications.

## **INFORMATION TO SELECTED USER GROUPS**

After receiving a positive access decision, the user groups can start preparing for their Transnational Access visit or Remote Access by contacting the relevant station manager. Detailed information about travel reimbursements and other practical matters related to the granted access can be found from the [Information for User Groups](#) and from the [e-Library/Info materials](#).

## **DISPUTES AND COMPLAINTS**

INTERACT staff have worked hard to gain funding from the EU H2020 that will support access for hundreds of researchers to Arctic and northern alpine area research stations. They also work hard, together with external expert reviewers, to evaluate numerous applications for access while station managers offering Transnational Access are committed to providing a service and procedure to facilitate successful TA visits with minimal administration. Although the ethos of INTERACT is to facilitate research and build capacity, occasionally complaints about procedures and decisions may arise. INTERACT therefore has a specific [Complaints Policy](#) concerning Transnational Access funding policy and procedures.

## **EU GENERAL DATA PROTECTION REGULATION (GDPR)**

The EU General Data Protection Regulation (GDPR) applies to 'personal data' meaning any information relating to an identifiable person who can be directly or indirectly identified in particular by reference to an identifier. The GDPR applies to all handling of personal data such as how to collect, handle, store and delete the data. The whole INTERACT Transnational and Remote access application, evaluation and reporting process follows the EU GDPR. The TA/RA related issues and procedures concerning the EU GDPR are provided in our [Data Privacy Policy](#). General information is also provided in the [INTERACT GDPR policy](#).
